I. W. MORRIS, Treasurer.

# **Detroit Thrives** Again as Motor **Buying Revives**

"The superior economy, speed and reliability of motor transportation.

"The cityward tendency of our population, which implies a constant increase in the transportation facilities both for freight and passengers, without which the urban population would starve and business would be at a standstill.

"The fact that the railroad short lines are being gradually abandoned and railroad building has practically stopped, thus leaving the American population of to-day dependent upon the automobile for the necessary increase in the transportation facilities Steady Gain in Employment, Chief Plants Have Orders

Dealers' Convention Hears

From a Staff Correspondent
DETROIT, Sept. 15.—This city, the capital of metordom, which at the beginning of 1921 was paralyzed industrially, has regained full use of its economic limbs. The recovery has been sustained for eight months, and the principal trade diagnosticians here are extremely hopeful regarding the future. The panicky fears of last December have given way to a temperad optimism.

The story of the city's rebound from a sudden collapse after a period of balloonlike expansion is told in the records of employment. At the greatest depth of depression, on January 1 of this year, there were only 37,500 persons gainfully employed here, according to the seemingly trustworthy estimates of the Employers' Association of Detroit. Figures for the current week, compiled to-day, indicate that mere than 174,000 are on the pay rolls. At the peak of the war boom, on March 23, 1920, there were 308,000-men and women employed within the confines of this municipality.

Growth Startled Residents

In the last decade Detroit grew with such amazing rapidity that no one now

Growth Startled Residents

In the last decade Detroit grew with such amazing rapidity that no one now is able to define normalcy locally. Exactly a year ago business here, though having receded somewhat from the high level of the preceding March, was still unusually large. At present there are 64 per cent as many gainfully employed in the city as a year ago.

Production, measured in terms of units of goods turned out, is greater relatively than a comparison of employment statistics indicates, for the testimony of automotive executives is that the efficiency of the human element in manufacturing has increased tremendously since the depression started. Many delegates to the fifth annual convention of the Motor and Accessory Manufacturers' Association, the second day's session of which was held to-day at the Hotel Statler, testified to the marked improvement in the productivity of men who toil in this industry, and similar statements were made by automobile officials, bankers and research men here with whom the Tribune correspondent discussed the and research men here with whom the Tribune correspondent discussed the

and research men here with whom the Tribune correspondent discussed the matter.

Detroit in ordinary years, like other big American cities, habitually has some unemployment. Though much smaller than at the beginning of the year, unemployment remains abnormally large, and trade estimates place it at 50,000 persons. The ranks would be still larger if the municipality were not pushing public works, particularly sewer building. Many of the outsiders who were employed in this "industrial Klondike" during the period of inflation have returned to the myriad places in agriculture and industrial centers from whence they were attracted by the lure of high wages. A canvass by local statisticians indicates that 75,000 members of this "suitease population" departed when hard times came. With rents and the cost of living high here, they preferred to go elsewhere during the months of industrial recession.

Ford Leads in Labor Productivity

Henry Ford, who remains aloof, un-ttached to business associations and solated from most of the other busi-

the coming winter hinges on the auto-motive industry, which amounts to three-fourths of the city's industrial life. Of the industries of this city, the miscellaneous group, which in-cludes stove making, drugs, industrial chemicals, brass and tools, is at present less prosperous than the makers of

Southern Pacific Election
H. B. Titcomb, vice-president of the Pacific Electric Railway Company, at a reorganization meeting yesterday of the Southern Pacific Railroad Company of Mexico, was elected a director and president of the company, filling the vacancy caused by the death of Colonel Epes Randolph. Other officers were reelected.

DIVIDEND NOTICES

| Less prosperous than the makers of passenger automobiles. The basis for optimism here is the fact that the corrective phases of readjustment and deflation have, in the opinion of commercial and financial leaders, taken place. Automobile prices have been to a large extent liquidated, and, although a price war is still being waged, industrial Detroit thinks that. compared with other products, automobiles are cheap. The local banks have been to a large extent liquidated, and although a price war is still being waged, industrial Detroit thinks that. compared with other products, automobiles are cheap. The local banks have been to a large extent liquidated, and, although a price war is still being waged, industrial Detroit thinks that. compared with other products, automobiles.

But a prosperous than the makers of passenger automobiles.

The basis for optimism here is the fact that the corrective phases of readjustment and deflation have, in the fourth prices have been to a large extent liquidated, and, although a price war is still being waged, industrial Detroit thinks that. compared with other products, automobiles.

But a deflation have, in the fact that the corrective phases of readjustment and deflation have, in the fact that the corrective phases of readjustment and deflation have, in the fact that the corrective phases of readjustment and deflation have, in the fact that the corrective phases of readjustment and deflation have, in the fact that the corrective phases of readjustment and deflation have, in the fact that the corrective phases of readjustment and deflation of readjustment and deflation have, in the fact that the corrective phases of readjustmen expected from the national shows in January, and when the crops are planted, even the most conservative bankers here predict a conspicuous

upturn. Steady Gain Encourages Bankers Detroit financiers find hope in the fact that the improvement has been steady and unspectacular. They regard the willingness of labor to readjust itself to changing conditions as a favorable factor, and, though disliking and hoping against a repitition of uneven booms followed by drastic depressions, they are looking forward to a slow return to permanent prosperity.
